

1. ES PRO 800M Automatic Grinding Machine

Essilor International / ESSILOR POLONIA Sp. z o. o

ES PRO™ 800M is a modern Essilor automatic grinding machine that combines speed, precision and versatility. Thanks to SuperVeloce™ technology, lens processing time has been reduced by up to 41% and milling time by 57%. The device supports all types of lenses, ensures a perfect fit to rims and minimal water consumption, increasing the efficiency and quality of work in every optical salon.

2. B.I.G. EXACT® SENSITIVE

RODENSTOCK POLSKA Sp. z o.o.

BIG EXACT® Sensitive Vision so smooth you might forget you're wearing glasses

3. INTELIO

JZO SA

Technologically advanced lenses for intermediate and near distances, for the comfort of work and leisure. • A groundbreaking approach to lens design for intermediate and near distances. • The Smooth Optics technology used ensures smooth transitions between viewing areas and reduces the effect of image float. • Intelio® lenses reduce the negative effects of prolonged computer work and other activities requiring the use of near and intermediate vision areas.

4. Bflex Eyeglass Frames Collection

Grand Vision Optics Ver Sport, S.L. / OPTYKA BRENK s.c.

How many customers of optical salons look like models from posters of famous eyeglass frame designers? And how many users dream of unbreakable, durable frames that will prove useful in everyday life? This very need inspired the creation of the Bflex collection – for people with an ordinary appearance, leading normal, active lives, without limitations. Bflex offers frames for everyone: mechanics, teachers, electricians, machine operators, nurses, salespeople, and anyone who wants to look good in glasses while appreciating quality and durability. Bflex frames are resistant to damage from falls, accidental steps or bending by a child, and can withstand intensive daily use. Thanks to special straps, they can be used during sports or under a motorcycle helmet, ensuring comfort and stability in every situation. Additional covers increase the functionality of the frames – the sun cover protects the eyes from the sun, while the yellow cover improves the contrast of vision, increasing the comfort of driving at night and in difficult conditions. Bflex is a collection of versatile, truly durable frames that have been created with real people's needs in mind and are suitable for real, everyday life.

5. F034 Model

Dek Optica owner of the Nenu Brand / DEK OPTICA Sp. z o. o. -

The F034 model is a slim, 90s-inspired frame with a delicate accent reminiscent of romantically curled eyelashes – like impressionistic brushstrokes adding lightness and femininity. It belongs to the Nenu Eyewear collection, born from a fascination with French Impressionism and named after Monet's 'Water Lilies' (Nenuphars). Each frame comes with a matching ring made of the same acetate, symbolising the zero waste concept and the creative use of the material. Designed and entirely made in Poland, it combines craftsmanship with artistic character, creating a unique accessory for women looking for subtle elegance in a modern version.

6. Carrera TRANSFORMA Sunglasses

Safilo Group SPA / SAFILO POLSKA Sp. z o.o.

Dedicated to those who are always one step ahead and can stand out with their sporty character but never compromise on style, the C-SPORT collection presents new sunglasses that are both sporty and fashionable. They feature iconic CARRERA details, enhanced with technical, sporty solutions for maximum comfort, such as dedicated rubber nose pads, adjustable, strongly curved temples for a better fit, and holes at the ends that complete the style with interesting accessories, such as lanyards, to secure the frame during training.

7. David Beckham 99/ORIGAMI Sunglasses

Safilo Group SPA / SAFILO POLSKA Sp. z o.o.

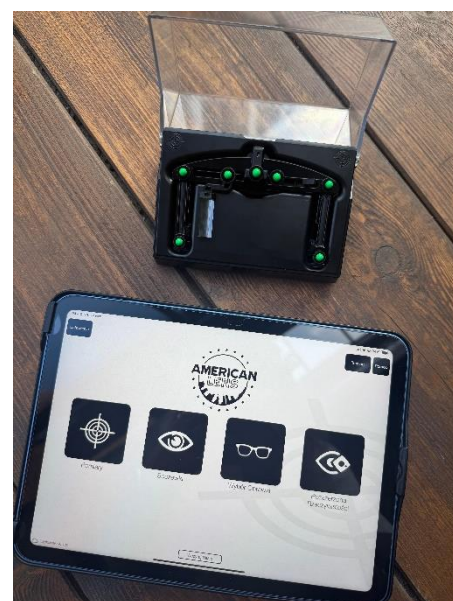

The 'Timeless Icons' line, from which the David Beckham 99/ORIGAMI model originates, has been enriched with subtle sunglasses and prescription frames dedicated to lovers of vintage accessories. This eyewear line includes metal and acetate models that exude a casual and classic style: designed for everyday wear, the new shapes stand out for their superior quality and maximum comfort.

8. OptikamPad

**Optikam Europe Fenris Visionary GmbH
AMERICAN LENS POLAND Sp. z o.o.**

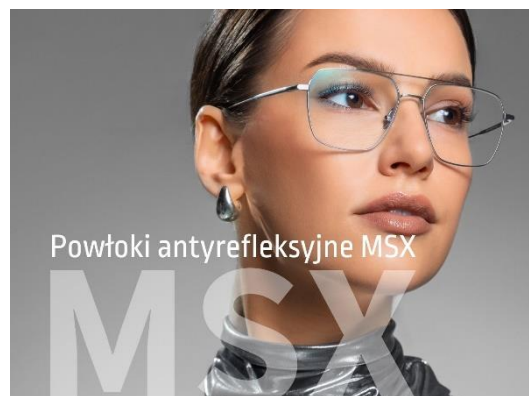

Modernise your optical salon with Optikam! Our digital measurement system guarantees a perfect fit of your glasses with unparalleled precision, eliminating manual errors. Increase customer confidence and premium lens sales with technology that impresses with its precision and modernity. Discover the future of optics with American Lens and Optikam.

9. MSX Anti-Reflective Coatings

Małgorzata Duda-Szajna
SZAJNA OPTICAL LABORATORY

Forget about annoying reflections and blurry images. MSX anti-reflective coatings make the world sharper, brighter, and more comfortable for your eyes – whether you're driving at night, working long hours at the computer, or scrolling through your phone. By reducing reflections, your eyes become less tired and stay relaxed all day long. Moreover, your eyes are perfectly visible, which facilitates natural eye contact and highlights the aesthetics of the glasses. Extra protection as standard: MSX coatings are resistant to water, grease marks and dust thanks to their hydrophobic, oleophobic and antistatic properties. This means less cleaning, fewer scratches and lenses that stay crystal clear longer. MSX – because your eyesight deserves the highest quality.

10. Seventh Street 7A 102

Safilo Group SPA / SAFILO POLSKA Sp. z o.o.

The Seventh Street collection is a masterpiece of craftsmanship and design: the Beta Titanium eyewear collection by Seventh Street is built on the incredible properties of alloy frames at a very affordable price. Elegant, durable and lightweight, these prescription glasses are an essential companion for confident, modern men who refuse to compromise on quality. Solidity, lightness and durability are the key pillars of products from this concept. An essential companion for elegant and confident individuals who seek refined shapes at an affordable price. The most refined material in the collection, true wearable masterpieces.

11. Shamir iFit™

SHAMIR POLSKA Sp. z o.o.

Introducing Shamir iFit™ – a revolution in eyewear fitting technology. This groundbreaking software provides accurate measurements for eyeglass frames and lenses of any shape, in seconds! Shamir iFit™ automates the entire process, making it effortless for both you and your clients. It records every parameter with speed and precision controlled by artificial intelligence (AI), including the most difficult-to-measure individual parameters such as the pan angle, pantoscopic angle and vertex. Available only with the Shamir Spark™ 4W measuring device, Shamir iFit™ software uses advanced technology to provide exceptional performance and accuracy. Shamir iFit™ takes precise measurements for any eyewear chosen by the customer, even sports wraparound frames, patent frames, and sunglasses. Guarantees accurate measurements for each individual, ensuring glasses are perfectly fitted to their unique facial anatomy. Shamir iFit™ makes measuring a quick, touchless experience that's easy for everyone – including seniors, children, and even people who need to maintain personal space. As simple as looking in the mirror.

12. JAI KUDO HyperView 4EVO Progressive Lens

JAI KUDO POLSKA Sp. z o.o.

Modern, premium+ progressive lenses will change the way you see the world. This is a state-of-the-art solution that provides not only exceptional visual quality, but also incredible comfort of use. With HyperView 4EVO, you can consciously choose the progressive glasses that best suit your needs and enjoy a unique visual experience.

13. RoadMaster Eyeglass Lenses

Małgorzata Duda-Szajna SZAJNA OPTICAL LABORATORY

RoadMaster are eyeglass lenses specially designed for driving. The power distribution in RoadMaster lenses includes a night vision zone that provides better vision quality and less fatigue when driving both during the day and at night. RoadMaster lenses are only available with Drive MSX anti-reflective coating, which reduces excess light that most affects vision when driving at night. The Drive MSX coating also reduces reflections and glare, increases contrast and shortens the recovery time after glare. RoadMaster lenses have a special component that improves comfort and safety when driving at night. It is located at the top of the lens, 10 mm above the centration cross. In this area the lens power is lower by 0.25D. Two products are available under the RoadMaster brand: OPTIPLAST RoadMaster HD single-focal lenses incorporate the main key design elements that are essential for daytime driving, offering superior lenses that improve visual comfort and provide the ultimate driving comfort at any time of the day or night. VEO RoadMaster progressive lenses feature a unique optical power distribution tailored to your vision while driving. The design takes into account visual needs both day and night, ensuring maximum comfort and reducing eye strain.

14. VisuPro Pre-Progressive Lenses

HOYA LENS POLAND Sp. z o.o

VisuPro – a new quality of vision for clients with the first symptoms of presbyopia. VisuPro is an innovative PRE-PROGRESSIVE eyeglass lens designed for active people over 35 who are experiencing the first difficulties with near vision. Thanks to advanced technologies and a personalised fit, VisuPro provides natural, comfortable vision at any distance all day long. This is the perfect solution for users who are not yet ready for progressive lenses but expect the highest quality and depth of vision.

15. INTUITIV Progressive Lenses

AMERICAN LENS POLAND Sp. z o.o.

CALMA is a progressive lens that gives vision a new dimension, turning it into a daily ritual of comfort and harmony. It provides smooth transitions between all distances, giving you a sense of calm and confidence in every situation of the day. It is luxury that does not flaunt a logo, but reveals itself through subtle quality and elegance, at work, while travelling, and in meetings with loved ones. CALMA is not a product, but an experience that soothes the senses. True luxury is peace of mind.

16. NIKON Z-SUITE PROGRESSIVE LENSES

Nikon Lenswear / JZO SA

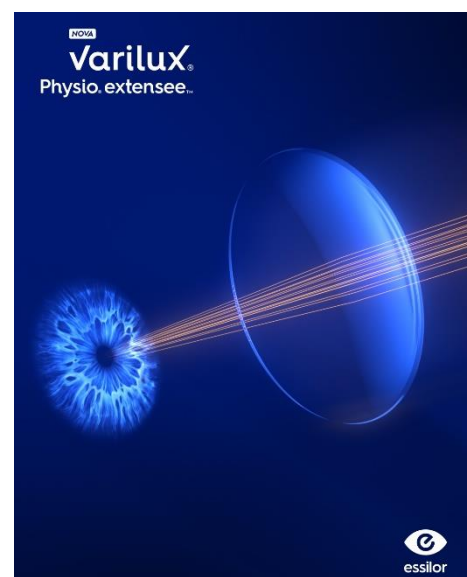

By combining excellence in contrast management with an understanding of human vision, Nikon Lenswear ushers in a groundbreaking new era in progressive lens design. Introducing the absolute NOVELTY: Z-Suite collection – our first line of progressive lenses, designed to precisely adjust the zones for near, far and intermediate vision and to enhance image contrast. Lenses from this series allow users to enjoy precise vision in all conditions.

17. Varilux Physio extensee Progressive Lenses

Essilor International / ESSILOR POLONIA Sp. z o. o

Varilux Physio extensee are new generation progressive lenses that, thanks to Pupilizer™ and DualOptim™ technologies, provide clear, contrast-rich vision – a new standard of progress, combining innovation, quality and comfort of everyday use.

18. NIDEK LFU-220 Filter System

NIDEK CO.,LTD JAPONIA / POLAND OPTICAL Sp. z o.o.

The LFU-220 filter system is a device designed to work with NIDEK automatic grinding machines and was created to introduce a new quality in the disposal of lens processing waste and reduce water consumption. This device enables responsible management of waste generated during lens processing, filters contaminants out and saves water used in the grinding process. The LFU-220 was created with the environment in mind, and the innovations it provides contribute to improving the ecological condition of our planet. This device provides comprehensive solutions for optics, thanks to its solid construction and advanced technology.

19. ZEISS DuraVision Gold UV

CARL ZEISS Sp. z o.o.

Over 90 years of experience in creating lens coatings has allowed us to create the DuraVision® Gold UV coating, which is the most scratch-resistant. DuraVision® Gold UV reduces light reflections from dusk to night when the eye's sensitivity shifts to shorter wavelengths – increasing light transmission for clearer vision. The subtle gold shade of this coating complements contemporary frames perfectly.

20. ZEISS VISUCORE 500

CARL ZEISS Sp. z o.o.

ZEISS VISUCORE 500 is a device that combines precise objective and subjective refraction in one cycle. It saves space and increases office efficiency by speeding up examinations while maintaining high accuracy – regardless of the staff's experience.

21. ZEISS VISUREF 1000

CARL ZEISS Sp. z o.o.

The ZEISS VISUREF 1000 offers a wide range of options for eye care professionals and their clients, combining essential tools for monitoring the anterior and posterior segments of the eye to detect a wide range of ophthalmic pathologies. The device integrates wavefront refraction, keratometry, pupillometry, corneal topography, and tonometry into one comprehensive system and provides advanced features that allow for an expanded range of services.
